ECS Configuration Change Request

CCR No. 97-0561	**Logged Date** 4/11/97	**Rev.** -	**Request Type** CCR

Priority Routine ☐ Urgent ☒ Emergency ☐	**Affected Release**	**Change Class** I I

Title (description)

Restrict access to observer

Documents Affected None	**Source Nos** (RID, NCR, Action Item, GSFC CCR, etc.) **or Tech Reference** CCR 97-0363

RTM Change   ☐   **Start New Baseline** ☐

Problem

Upon resolution of the above mentioned CCR (upgrading observer to Solaris 2.5.1), several unauthorized users, both internal and external, were discovered.

Proposed Solution

Restrict access to this machine. The internal users were using it as a gateway outside the firewall. This ties up machine resources. The external users were coming from dialup accounts of unknown origin and intent. This problem speaks for itself. A user group should be set up that is restricted to Science Office web developers only. Special requests from other organizations can be handled on a case-by-case basis.
